

Meet Catherine Mumbi

Profile	
Name	Catherine Shula Mumbi
Birthday	4th July 2009
Birthplace	Lusaka, Zambia
Area Of Residence	Kalingalinga
Father	Deceased
Mothers Name	BibianMumbi
Mothers' Profession	House maid
Primary School	Jesus Army
2021 Grade level	Grade 7

Family Background

Catherine lives with her mum and 4 siblings in Kalingalinga Compound. Catherine's parents divorced when she was 3 years old and she has been living with her mother ever since. Her mother works as a maid to sustain her family and pay for rentals. Her mother, Bibiana says Catherine is well-behaved and hard-working. Bibiana believes that the KF scholarship will help Catherine attain secondary and tertiary education and achieve her dreams because unfortunately, Bibiana's financial status does not allow her to provide her family with most of their needs.

Academic Background

Catherine attended Jesus Army Primary School. The school recognized her leadership qualities and she was thus made a prefect in Grade 5 and class monitor in Grade 6. From her grades, it is clear that Catherine is very consistent in her academic performance and possesses high potential. Catherine's favourite subjects are mathematics and science and aspires to be a doctor.

Extracurricular Activities

At school, Catherine takes part in Art Club while at church, she is part of Sunday School and sings. In a singing competition at church, she was awarded money for coming in third position.

KF's Thoughts on Student

In spite of the mother's financial situation, Catherine has been producing excellent results. Her determination to do her best was visible even during the KF recruitment interviews. She was so certain of getting the scholarship because she believed in herself. I would describe Catherine as one possessing a strong personality, always focused and confident to pursue her dreams.

Student's Thoughts

Catherine hopes to get the scholarship so that her family can be assisted financially and so that she can achieve her goals in life. In her community, she hopes to one day help build a drainage system because its current condition is bad.
